ANNOUNCEMENT.

St. Luke's is a General Hospital organized in 1871 under the auspices of the Episcopal Church; but no distinction is made between the various nationalities or creeds, its doors being open to all. Patients are allowed every facility for receiving the consolations of their own churches.

The hospital is situated on Valencia street near junction of Mission street, surrounded by spacious, well kept grounds. It is free from the cold winds, fog and noise of other portions of the city, while at the same time easily accessible by the Valencia street cable cars, which pass the door, also by the Mission street line and the San Francisco and San Mateo electric cars which pass within half a block. The Valencia street station of the broad guage road to San Jose is within two blocks.

The corps of Attending Physicians and Surgeons is composed of men of known reputation and ability.

The members of the House Staff are also thoroughly efficient and attentive to their duties.

The Directors desire especially to bring St. Luke's Hospital to the notice of patients from a distance who may desire special treatment from surgeons or physicians in the city. Such persons can be accommodated as in a hotel, yet have the care and comfort of a home, and have their own physicians and nurses if desired.

St. Luke's Hospital cares for three classes of patients:

In the first class are those who are able to pay the hospital charge for board, nursing and medicines but are unable to pay for the services of a physician or surgeon; in such cases medical attendance is furnished by the hospital; the second class consists of private patients who select their own physicians or surgeons (who may be members of the attending staff or not), and who come to the hospital for the accommodations it affords; the third class is composed of those who are unable to pay anything to the hospital and are admitted to the free beds.

A bed in the wards will be \$12.00 per week.

A bed in a room containing two beds, \$2.00 per day.

A private room from \$2.50 to \$5.00 per day, depending upon the size and location of the room, as follows:

Rooms in the main building, \$2.50 per day.

Rooms in the Gibbs Building, \$3.00 per day, excepting the corner rooms, which shall be \$4.00 per day.

Rooms in the Mills Building, intermediate rooms, \$3.00 per day; corner rooms, rear, \$4.00 per day; front, \$5.00 per day. These latter rooms get the sun from morning until night, have four windows, are very roomy, and have bath and toilet adjoining.

The above rates include board and the divided attention of nurses. Patients requiring the undivided attention of a nurse will be charged \$3.00 per day extra for a hospital nurse. If a hospital nurse cannot be spared, a graduate nurse can be obtained for \$25.00 per week, and 75 cents per day, or \$5.00 per week will be charged by the hospital for her board.

A small charge is made for medicines, and the hospital reserves the right to charge for articles of food not on the regular diet list, when especially expensive and out of season. The culinary department of the hospital has been greatly improved, and it is the intention of the management that patients shall have such desires as to food and comfort satisfied as do not conflict with the orders of the attending physician.

The special diet is regulated by the attending physician's orders, and meals are served at regular hours.

Typhoid fever cases, when requiring considerable nursing, but yet not sick enough for special nursing, will be charged \$10.00 per week extra.

All kinds of acute, curable and non-contagious diseases are treated in the hospital. Chronic and incurable complaints may be received and retained at discretion, but will not be permanently provided for. No patients are admitted suffering from any ailments that would occasion discomfort to other patients.

Especial care is given to obstetrical cases, the charges for which are from \$2.00 to \$5.00 per day for the room, and \$16.00 per week for a special nurse, who is required for the first week, and

can be retained longer if desired. This makes the least possible charge for the two weeks' stay \$44.00. To this is to be added the physician's fee of \$25.00 unless the patient is already under the care of a physician, or is in some special need of charity.

Hospital patients able to pay will be charged for medical attendance and for surgical operations, in proportion to their severity and importance. Ten dollars will also be charged for the use of the operating room, which includes the charge for the anesthetic, dressings, etc.

Patients sent into the hospital by physicians not on the hospital staff cannot be treated by any member of the hospital staff except by special request from the doctor sending the patient into the hospital. The Board of Directors desire to extend every hospitality to the physicians of the community at large, and to assure them every attention and courtesy from the resident executive and medical staff. Their orders will receive the same attention as those of the regularly appointed visiting staff. Many conveniences which add greatly to the efficacy of the hospital work are being installed from time to time, and a most satisfactory service is guaranteed to any physician or surgeon treating their patients here.

The number of nurses in the training school has been largely increased so that this department is unsurpassed for the efficiency and excellence of its service.

The hospital now has a well organized laboratory, supervised by a resident pathologist. One member of the interne staff devotes his entire attention to the examination of the blood and urine, so that quick and efficient service is rendered.

Complete records are kept of every patient from admission to discharge to enable those physicians and surgeons, who so desire, to obtain ready reference to their cases.

New instruments are constantly being added to the operating room armamentarium, while it is proposed to soon add a complete outfit of electrical apparatus for urethral, bladder and ureteral examinations, and for trephining; an X-ray apparatus has been installed. The hospital is lighted by electricity.

The plumbing, drainage and sewerage of the hospital are of the latest and most improved kind.

Patients should make definite arrangements with the visiting physician or surgeon as to fees, previous to or upon entering the hospital.

Payments are to be made for two weeks in advance; any unexpended portion will be refunded. The hospital will not be responsible for money or other valuables belonging to patients, unless deposited with the cashier.

Patients' laundry is done at their own expense outside of the hospital.

Pay patients can have their own private physicians or nurses if they so desire. All reputable physicians and surgeons are invited to send their patients to the hospital, where they may attend them without fear of interference. The hospital is always glad to assist doctors in obtaining trained nurses.

Seven thousand dollars endows a bed in perpetuity in the wards.

Three thousand dollars endows a bed in the wards for thirty-three years.

Fifteen thousand dollars endows a room in perpetuity in the new pavilion.

The annual charge for the support of an adult's bed in the wards is \$400.

REPORT OF THE PRESIDENT.

In consequence of the much regretted resignation of Mr. A. N. Drown as president of St. Luke's Hospital, caused by his intended prolonged absence, the undersigned was elected president in his place and assumed the duties of the position on June 8th, 1904.

The reports of the Superintendent, Resident Physician, Pathologist, Chaplain, and Superintendent of Nurses, which are herewith submitted, are so exhaustive in statistics and information concerning the needs of the hospital, that there is but little left to be presented by the President in this thirty-third annual report.

During the year ending September 30th, 1904, 1,468 patients were treated as against 1,513 in the preceding year.

The total number of days of hospital care were 31,053, of which 1,157 days were to free patients, making an average of 3 2-10 free patients daily.

During the past year the following large expenditures have been made for betterments and necessary improvements, viz:

The opening of Duncan street	\$ 3,148
The introduction of an electrical plant and wiring	3,350
Turning lathe	375
Mangle for laundry	300
Twenty (20) fire extinguishers	200
Betterments and improvements at hospital	6,904
Total	\$14,277

By very careful management and economy, this large expenditure has been met out of the income of the hospital.

The opening of Duncan street has long been desired and its consummation insures an abundance of light and air for the buildings facing on that street.

The introduction of the electrical plant furnishes the motive power for pumping water from our well, for the laundry machinery, for manufacturing electrical light for the buildings and

for other purposes. This has proved to be a great economy in the management of hospital affairs. The cost of this electrical plant will be saved in three years by its reduction of expenses.

The purchase of a turning lathe saves a very considerable expense which has heretofore been incurred by our being obliged to have minor repairs to our machinery done at outside machine shops, and in doing other work.

The improvement of our laundry machinery enables us to do much more and better work, more quickly and at less expense than in the past.

The purchase of twenty of the most approved fire extinguishers has materially increased our facilities for putting out fire promptly in all parts of our buildings.

The Rev. J. F. Trivett has recently been appointed as Superintendent. He has been doing two days' work in each week in the Superintendent's office for the last five months and has shown so much aptitude for the work as to convince us that he will discharge the varied duties of that very important position with marked ability. Previous to Rev. Mr. Trivett's appointment, Archdeacon Emery has filled the position with the same intelligent, capable, careful and efficient service as he brought to bear in the discharge of its duties in the previous year. Every member of the Board of Directors appreciates the great value of Archdeacon Emery's services and feels that St. Luke's Hospital is under a debt of gratitude to him which can not be overestimated.

The President also takes great pleasure in acknowledging the indebtedness of St. Luke's Hospital to the visiting and consulting medical and surgical staff for their valuable services to patients and their active interest in the hospital affairs. In the meetings of the Committee of Conference, which consists of the Executive Committee of the Board of Directors and three members of the Visiting Staff, the Visiting Staff have shown a sincere desire to act in harmony with the Board of Directors, and given abundant evidence of their intention to do all that was in their power to promote the best interests of the hospital.

It was with deep regret that the resignation of Dr. Washington Dodge was accepted, as a member of the Visiting Staff, but by

unanimous vote of the Board, with hearty concurrence of the Visiting Staff, he has been elected one of the Consulting Staff of the hospital.

The Directors also wish to record the fact that the Resident Physician and the various employees of the hospital in all departments, have performed their duties faithfully and intelligently.

During the past year we have lost the services of Miss Sophie L. Rutley, the Superintendent of the Training School and Superintendent of Nurses, whose resignation was regretted. Miss Rutley was a very competent Superintendent and painstaking in the discharge of her duties. Her place has been filled by the appointment of Miss M. K. Smith, who has had a valuable experience of ten years in New York. Her appointment was suggested after extended investigation made by members of the Visiting Staff when attending the meeting of the American Medical Association in the East, and the wisdom of their selection has already been demonstrated by the efficient work performed since she took charge.

As my predecessors have done, I also wish most earnestly to appeal to the many friends of the hospital to start a movement to obtain gifts amounting to at least \$30,000, to enable the Board of Directors to build a nurses' home and training school building, which is the greatest need of the hospital at the present time. We have room for it upon our ground and the Directors sincerely hope that sufficient interest may be felt in this matter to enable them to carry out their long desired wish for the erection of such a building.

The Directors have been obliged to expend much money during the past year in necessary and economical improvements, that they have been unable to add to the sinking fund for the payment of the mortgage of \$45,000 upon the property, but as our income is steadily increasing, it is expected that a very considerable amount will be placed to the credit of this fund during the coming year.

Respectfully submitted,

CHAS. D. HAVEN, President.

SAN FRANCISCO, Nov. 14, 1904.

To the Board of Directors of St. Luke's Hospital:

DEAR SIRs:—The undersigned, appointed to audit the accounts of the Treasurer of the Hospital for the year last past, would report:

That we have carefully examined the books and checked the various items as entered, and find the same correct.

We find that the various sums reported to the credit of the Sick Childs' Cot Fund, the Pixley Fund and the Reserve Fund are deposited with the San Francisco Savings Union and the Savings and Loan Society, and are intact.

That the balance subject to draft is on deposit in the Bank of California in the name of St. Luke's Hospital.

FRANCIS AVERY,
WILLIAM MINTZER,
Auditing Committee.

THE NEW GIBBS BUILDING

REPORT OF THE EXECUTIVE COMMITTEE

To the President and Board of Directors of St. Luke's Hospital:

GENTLEMEN—Pending the selection and election of a superintendent, the internal work of the hospital during the past year has been carried on by the Executive Committee of your Board. This has been possible because of the division of internal administration into departments, referred to in last year's report, and the statement of changes and present conditions can best be made by taking up these departments in their order.

1. The office continues under the efficient care of Miss R. Whiteside, whose services are the more valuable, because of her loyalty to the institution and her tact and patience in meeting the constant stream of patients, visitors and business men who make heavy drafts upon her time. The business of the hospital is conducted as systematically as that of any other corporation. No purchases are made, save on a written requisition, signed by the head of the department, asking for the supplies, and countersigned by the Superintendent. All bills are audited monthly by the Auditing Committee of the Board, and none can be paid save on the written approval of said committee. The card system is in full force so that the Auditors can compare every bill of every kind with like expenditure for a series of preceding months. Every dollar received at the hospital from any source is paid to the treasurer and deposited by him in the Bank of California. No money can be drawn out save by a warrant signed by the President and Secretary, and the warrant and cash book at the hospital, the check book and cash book of the Treasurer, and the bank book itself, provide a cast iron system of protection to the funds of the hospital, that is reinforced by the annual auditing of the Treasurer's books, and the inspection by the Auditors of his bank books and cash balances. From these cards it appears that the daily cost per capita, including all expenses save renewals and betterments, has been for the past year \$1.09.

2. The Matron's department continues under the charge of Mrs. Bowen, who maintains a vigilant oversight over the kitchen,

the laundry and the help. A new French range has been installed in the kitchen and many changes and improvements made, while year by year the Matron puts up the preserves and jellies that are in constant demand. During the past year a little society of children in St. Luke's church, under the direction of Mrs. Kirk, have made some linen for the hospital. If all the churches would do in proportion what has been accomplished by this small band, the needs of Mrs. Bowen's department could easily be met. As it is, new rugs for the rooms in the Mills building are a pressing necessity, and the said building should have a fresh supply of good china and dainty table linens at once.

3. We would note the efficient service rendered by Mr. Apel, our present pharmacist, who is ever on the lookout to save for the hospital.

4. The Executive Committee would especially call your attention to the exceptional services rendered by Mr. C. E. Moreton, chief engineer, in charge of the engineering department. During the installation of the electric plant, the wiring of the buildings, the changing of machinery in the laundry and the installation of the static coil in the operating rooms, Mr. Moreton has shown what a faithful employee can be to an institution if his heart is in his work. With him there has never been the question raised of overtime, but repeatedly he has put in his twenty-four hours of service in his anxiety to have things done properly. The garbage furnace and the lathe are both results of his urgent representations of needed expenditures that would result in saving money, though both necessitate more labor to him and his faithful assistant. In a report of this kind it would be impossible to enumerate all that the committee feels they are indebted to Mr. Moreton, not only for valuable suggestions, but for services rendered over and beyond his agreement, and they feel justified in asking that at the annual meeting of the corporation a vote of thanks be tendered to him. We ask this the more readily because we know that he has refused a position at a larger salary than we can pay, because he felt that various improvements had been made at his suggestion, and that in honor bound he should stay and prove that they were for the best interests of the hospital.

5. In the laundry an opportunity offered to secure an almost new mangle and a body ironer, valued at \$1500 for \$850, the terms being \$150 down and the balance at \$100 per month. We availed ourselves of the chance and the work of the laundry under Mr. Armstrong has never been so acceptable as at the present time.

6. The payroll during the past year has been somewhat increased. The carpenter's department is under Mr. Schroder, but in addition we have had in almost constant employ a painter, and for six months past an extra man for general work, mostly under the chief engineer. It is a very conservative estimate to state that the saving affected by this addition to our payroll in the actual cost of renewals and betterments has been over \$2000. All the rooms in the Gibbs have been repainted, new screens have been put in all the windows and innumerable small repairs have been made that if done by outside labor would have cost treble the sum actually expended.

The Executive Committee would here acknowledge the debt they owe to Dr. L. W. Allen, the former Resident Physician and Acting Superintendent in the year 1902-3, for his many suggestions and hearty co-operation in all the efforts of the committee to bring about the changes that have had such signal results.

Referring to the last report we note the special expenditures of the last twelve months:

Duncan street improvements	\$3,148
Retaining wall	960
Electric plant and wiring.....	3,537
Static coil (X-Ray).....	710
Lathe	375
Mangle and body ironer.....	850
Renewals and improvements as per cards.....	6,904
Total for the year.....	<u>\$16,484</u>

As contributing to the material improvement in the hospital service we must acknowledge the faithful day by day service of Dr. Chilson, Resident Physician, and the internes under his charge, coupled with the labors and co-operation of the Visiting Medical

and Surgical Staff, who have so markedly made the best interests of the hospital their own, recognizing the limitations of the corporation because of absence of endowments and gifts and ever meeting the Executive Committee and the Board on the one ground of wishing to advance in every way the best interests of the hospital.

With the beginning of the new fiscal year, the Rev. J. L. Trevitt is to assume the duties of Superintendent, his business training in earlier life, his tact in dealing with all classes of people, and his deep interest in institutional work, makes us confident that it was wise to wait, since by waiting we have been able to secure the services of one so well fitted for the position.

NEEDS OF THE HOSPITAL.

1st. Money to pay the mortgage debt of \$45,000.

2nd. A home for the Training School for Nurses; estimated cost, \$30,000.

3rd. Apparatus for the laboratory, Dr. Halton should have, \$500.

An ice plant for better service in our culinary department, cost \$400.

A new well and tank to provide all the water needed, estimated cost \$750, but annual savings, \$720.

The old buildings ought to be repainted, the old furniture, bedding and crockery should all be renewed. We have the location. We have the plant. We have a staff second to none claimed by any hospital in the city for standing and efficiency. We have a corp of employees that any institution might be proud of. What we need is the support of those who should be our friends.

The amount of free work done during the past year is noted in the report of the President. The rectors of various parishes ask the hospital to receive free of charge, worthy patients who are unable to pay, and rarely is the request refused, but the fact regretted most by your committee is that with a few notable exceptions there are few parishes who send in the offerings asked for on St. Luke's day. And yet the hospital is the institution in the

diocese that has the largest valuation, the largest income and is capable of doing the greatest amount of practical good.

Your committee, through your Board, would ask that the members of the corporation would take an active interest to change this condition of affairs. We must very shortly take up the note at the Hibernian Bank for \$45,000. We must do this or make some provision for another creditor. We have done all in our power to put St. Luke's on a sound financial footing so far as current expenses are concerned. Now we must ask the members of the corporation to devise means for the paying of that indebtedness and for these needed additions to the plant, for which we, as a committee, are not responsible.

JOHN A. EMERY,
A. N. DOWN,
CHAS. D. HAVEN,
Executive Committee.

REPORT OF THE RESIDENT PHYSICIAN

To the President and Board of Directors of St. Luke's Hospital:

GENTLEMEN:—I have the honor of submitting herewith to you a report of the medical and surgical work of the hospital for the past year. You will, no doubt, notice, that compared with the previous year, the number of patients treated and operations performed is not so great. This, I think, does not mean that the hospital is less popular or that the increase in rates has kept patients away. But, as is shown by the report of the Board of Health, the people of San Francisco have enjoyed better health.

Many things have been done during the year to improve the service, among which may be mentioned the installation of an X-ray outfit, completely equipped for doing fluoroscopic, radiographic and therapeutic work; also a cantery transformer with bone drill and air compressor attachments.

New instruments have been added to the operating department from time to time.

The interne staff has been increased from five to six, thus making it possible for one man to devote his whole time to the work in the laboratory and give a better service in that department.

By an extra set of cards the records of discharged patients are now filed according to disease, as well as by names.

Being asked by your Honorable Board to state what I consider to be the one most urgent need of the hospital, I do not hesitate to say, a home for the training school. Our nurses are now being housed in rooms which were intended and which might be used for patients, thus cutting off quite a source of income to the hospital. Very respectfully yours,

WILLIAM C. CHILSON, M. D.,

Resident Physician and Surgeon.

THE OPERATING ROOM

B. OPERATIONS.

Totals, 375. Deaths, 27. Rate of Mortality, 7.20%.

	Totals	Deaths
TREPHINING—1.		
For fracture of skull	1	1
Totals	1	1
AMPUTATIONS—10.		
Of arm for compound fracture.....	1
Of hip for chronic osteomyelitis.....	1
Of hip for senile gangrene.....	1	1
Of hip for streptococic infection.....	1	1
Of leg for compound fracture.....	1
Of leg for gangrene.....	2	1
Of leg for tuberculosis of ankle.....	1
Of thumb	1
Of toe for deformity.....	1
Totals	10	3
SEQUESTROTOMY—6.		
Of femur for tubercular osteomyelitis of lower end.....	1
Of radius for chronic osteomyelitis.....	1
Of tibia for acute osteomyelitis.....	1
Of tibia for chronic osteomyelitis.....	2
Of great toe for necrosis of 1st phalanx.....	1
Totals	6
OSTEOPLASTY—3.		
Osteotomy of tibia for deformity due to slow growth.....	1
Suturing patella for fracture.....	1
Wiring ulna for fracture.....	1
Totals	3
RESECTIONS IN CONTINUITY—6.		
Of ribs for empyema.....	5
Of tibia and fibula lower 1-6 for tuberculosis.....	1
Totals	6
JOINTS—11.		
Aspiration for synovitis (chronic) of knee.....	1
Curettage of sinus of elbow.....	1
Disarticulation at shoulder for crush.....	1

	Totals	Deaths
Excision of bursa of knee for chronic bursitis.....	1
Excision of carpo-phalangeal articulation, 1st finger, for tuberculosis	1
Excision of fibroid tumor of knee.....	2
Excision of hip for tuberculosis.....	1
Excision of knee for tuberculosis.....	1
Excision of patella for crush.....	1
Reduction of congenital dislocation of hip.....	1
Totals	11
NERVES—1.		
Excision of Gasserian ganglion for trifacial neuralgia.....	1
Totals	1
ABDOMEN.		
Stomach—2.		
Gastro-enterostomy for carcinoma of.....	2
Totals	2
Gall Bladder—3.		
Cholecystostomy for cholecystitis.....	2
Cholecystostomy for cholelithiasis.....	1
Totals	3
Intestines—6.		
Colostomy for carcinoma of rectum.....	1
Colostomy for obstruction.....	1	1
Entero enterostomy for strangulated inguinal hernia.....	2	2
Enterorrhaphy after rupture due to trauma.....	1
Laparotomy for volvulus.....	1	1
Totals	6	4
Appendicectomy—63.		
For appendicitis, acute catarrhal.....	30	3
For appendicitis, chronic.....	9	0
For appendicitis, gangrenous.....	4	1
For appendicitis, gangrenous, c, appendicular abscess.....	7	1
For appendicitis, gangrenous, c, general peritonitis.....	4	2
For appendicitis, gangrenous, c, general peritonitis.....	12	0
Concomitant	7	2
Incision and drainage for appendicular abscess.....	7	2
Totals	63	9

	Totals	Deaths
Herniotomy—25.		
For femoral hernia	1
For inguinal hernia	21
For inguinal hernia strangulated.....	2	1
For ventral hernia	1
Totals	25	1
Kidneys—8.		
Decapsulation for nephritis.....	1
Nephrectomy for tubercular kidney.....	2
Nephrotomy for nephralgia and adhesions.....	1
Nephrotomy for renal calculi.....	1
Nephrotomy for tubercular kidney.....	1
Nephrorraphy for nephroptosis.....	2
Totals	8
Miscellaneous Abdominal—25.		
Closing of old granulating wound of.....	1
Cuvettment of old granulating wound of.....	1
Laparotomy for abdomino-vaginal fistula.....	1	1
Laparotomy for adhesions.....	1
Laparotomy for carcinoma of bladder.....	1
Laparotomy for carcinoma of intestines.....	1
Laparotomy for carcinoma of stomach.....	2	1
Laparotomy for exploratory for carcinoma of liver.....	2
Laparotomy for exploratory for pain.....	1
Laparotomy for fecal fistula.....	1
Laparotomy for general peritonitis.....	1	1
Laparotomy for obstruction of bowel due to carcinoma.....	1	1
Laparotomy for pelvic abscess.....	5	1
Laparotomy for ruptured intestine, general peritonitis.....	1	1
Laparotomy for sarcoma of omentum.....	1
Laparotomy for transplanting ureter into bladder from vagina	1
Laparotomy for tubercular peritonitis.....	3	2
Totals	25	8
RECTUM AND ANUS—3.		
Incision for blind internal fistula.....	1
Incision and curettment for fistula in ano.....	2
Totals	3
MALE GENITALIA—49.		
Circumcisions	12
Excision of hydrocele.....	7

	Totals	Deaths
Excision of varicocele.....	16
External urethrotomy for foreign body in bladder.....	1
External urethrotomy for ruptured urethra.....	1
External urethrotomy for stricture.....	2
Internal urethrotomy for stricture.....	2
Ligating vessels in scrotum for secondary hemorrhage.....	1
Prostatectomy for hypertrophy of prostate.....	3
Prostatectomy, suprapubic, for hypertrophy of prostate.....	1
Repair of urethral fistula.....	1
Testicle removal of for carcinoma.....	1
Testicle removal of for undescend.....	1
Totals	49
TUMORS—9.		
Excision of cyst from breast.....	2
Excision of epithelioma of cheek.....	1
Excision of fibroma of lower lip.....	1
Excision of papilloma of nose.....	1
Excision of sarcoma of neck.....	1
Excision of sarcoma of 10th rib.....	1
Excision of tubercular nodules in skin.....	1
Excision of wen of back.....	1
Totals	9
GLANDS—29.		
Amputation of breast for carcinoma.....	2
Amputation of breast for cystoma.....	4
Excision of axillary.....	3
Excision of cervical for carcinoma.....	1
Excision of cervical tubercular.....	10
Excision of inguinal for carcinoma.....	1
Excision of inguinal for suppurative adenitis.....	4
Excision of sebaceous cyst of cheek.....	1
Excision of thyroid for goitre.....	2	1
Exploratory incision into breast for carcinoma.....	1
Totals	29	1
BLOOD VESSELS—25.		
Excision of varicose veins.....	8
Hemorrhoidectomy	13

REPORT OF THE CHAPLAIN

San Francisco, October 18th, 1904.

To the President of St. Luke's Hospital:

DEAR SIR—I beg to submit my annual report as Chaplain of St. Luke's Hospital for the year ending September 30th, 1904.

The services have been maintained regularly in the Brotherton Memorial Chapel at the hours appointed. Evening prayer with an address has been held on Wednesday evenings. The Holy Communion has been celebrated publicly in the chapel on the first Wednesday of each month at 6:45 a. m., and privately in room or ward to patients unable to attend the chapel. All church patients have been called on and others seeking the ministrations of the church have also been visited. The attendance at the services during the year has been good.

I desire here to express my thanks for their assistance in conducting services to Archdeacon Emery and the Rev. J. Trivett; also to express the appreciation of all for the services of Mrs. Myers of the Training School, who has served as organist for the year.

Services:

Evening prayer and address.....	52
Holy Communion (public).....	10
Holy Communion (private).....	9
Baptisms	1
Confirmations	1

Respectfully submitted,

J. P. TURNER, Chaplain of St. Luke's Hospital.

REPORT OF THE ST. LUKE'S HOSPITAL TRAINING SCHOOL FOR NURSES

To the President and Board of Directors of St. Luke's Hospital:

GENTLEMEN:—As I have but very recently been connected with the hospital, I am not in a position to review the work done by the Training School during the past year.

Miss Sophia L. Rutley, who for the past three years has been Principal of the Training School, resigned during May, 1904, owing to ill-health, and Miss Lyda Bell, Operating Room Nurse, filled the dual position until August, when the writer, a graduate of St. Luke's Hospital, New York City, took charge.

In September Miss Bell also resigned as Operating Room Nurse for an indefinite period and much needed rest. Her position has thus far not been filled, one of our School Nurses, Miss Hammond, assuming the responsibilities very creditably.

The graduating exercises were held on the evening of April 7th in the church of St. John, the Evangelist, with religious services conducted by Bishop W. F. Nichols. Rev. Archdeacon Emery presided. Addresses were given by Drs. C. G. Kenyon and Geo. H. Evans. Eight nurses graduated, diplomas being presented by Bishop Nichols and badges by Dr. Kenyon, after which all present adjourned to the Guild Hall, where refreshments were served and a social time spent.

The time lost through illness of pupils amounts to 380 days, 57 of these are charged to one nurse, who had diphtheria, the remainder being consumed by nurses who were incapacitated for duty from one day to a week each.

The increased work of the hospital requires a larger corps of nurses than we have had in the past, although we have increased the number from 42 to 46 during the past year, we cannot, with any comfort, accommodate them, and moreover ought to have 50 nurses to meet the requirements of the hospital.

It is hoped with the coming year that our Board of Managers will be enabled, with the kind assistance of some philanthropic person, to build our long-needed Nurses' Home.

During the coming year we are to have a modern diet kitchen opened, where scientific cooking will be taught by a competent instructress. This means improved service to the patients and great economy to the institution.

An expression of our gratitude is due the Medical Board for lectures delivered and the physicians to the Training School for services rendered in time of illness.

W. K. SMITH,

Superintendent of Training School.

TRAINING SCHOOL FOR NURSES.

Year ending Sept. 30, 1904.

The statistics are as follows:

Number of pupils remaining Sept. 30, 1903.....	42
Number of probationers remaining Sept. 30, 1903.....	1
Number of pupils graduated.....	9
Number of pupils and probationers rejected and resigned....	12
Number of pupils remaining Sept. 30, 1904.....	40
Number of probationers	6

The outline of class work for the course is as follows:

FIRST YEAR.

Materia Medica, Dock.
Text-book of Nursing, Storey.
Practical Demonstrations.
Anatomy and Physiology for Nurses, Diana C. Kimber.
First Medical Examination.
First Surgical Examination.

SECOND YEAR.

Course in Urinalysis, Practical and Theoretical.
Course in Bacteriology, Practical and Theoretical.
Dietetics.
Medical Cases, Hughes.
Course in Massage.
Second Medical Examination.

THIRD YEAR.

Surgical Cases.
Obstetrics, Practical and Theoretical.
Children's Diseases.
Final Examination.
Theoretical and Practical Demonstrations.

LECTURES.

- Fractures, Dr. C. G. Kenyon.
Special Surgical Cases, Dr. Geo. J. McChesney.
Before, During, and After Operation, Dr. Moore.
Catheterization and Enemata, Dr. Lewis W. Allen.
Medical Emergencies, Dr. Harold Hill.
Cause, Prevention and Care of Tuberculosis, Dr. Clark J. Burnham.
Dietetics, Dr. Clark J. Burnham.
Nursing in Contagious Diseases, Dr. Geo. H. Evans.
Composition of Foods and Their Assimilation, Dr. Chilson.

COURSE OF TRAINING

The instruction will cover all that is necessary to fit the pupils to be thoroughly competent nurses, and include:—

1st. The care of sick-rooms and wards, and the principles of warming and ventilation.

2d. The management of helpless patients, making beds, changing bed and body linen and giving baths while the patient is in bed. The prevention and dressing of bed sores.

3d. The dressing of blisters, burns, sores and wounds; the application of fomentations, poultices, cups and leeches, and all minor dressings.

4th. The administration of enemata and douches, and the use of the catheter.

5th. Massage and the giving of all kinds of baths; disinfection and prevention of contagion.

6th. Bandaging, making bandages and rollers, and the padding of splints.

7th. The principles of cooking and the preparation and serving of food for the sick.

8th. Obstetrical nursing; nursing of sick children.

9th. The care of patients before, during and after surgical operations; control of hemorrhage; artificial respiration.

10th. To observe accurately and report the state of the secretions, expectoration, pulse, temperature, skin, effects of diet, stimulants and medicine, sleep and mental condition.

The teaching will be given by the Principal of the School, the Resident and Attending Physicians and Surgeons, and by competent lecturers.

Lectures, recitation and examinations will take place at stated periods.

INFORMATION AND RULES FOR PATIENTS

1. Board must be kept paid at least one week in advance.
2. Emergency cases will be admitted unconditionally at any hour.
3. Extra charges will be made for medicines, surgical dressings, massage, mineral waters and articles of food not on the regular dietary.
4. All patients able to pay will be charged for surgical and obstetrical work.
5. For the use of the operating room the charge is \$10.
6. All patients admitted to the hospital will be required to conform to the rules of the institution.
7. Profane or indecent language, loud talking, reading, or calling across the ward, are not allowed.
8. Patients shall not leave the hospital grounds without obtaining permission from the office.
9. Patients are expressly forbidden to spit anywhere excepting in their spittoons, or to smoke or use chewing tobacco without the permission of the Resident Physician or Surgeon, and are prohibited from throwing litter on the floor, walks or lawns.
10. No food delicacies of any kind, wines, liquors, medicines, etc., will be brought to patients from outside the hospital, except by special permission of the authorities, and no patient will be allowed to have any of these articles unless prescribed by the physician in attendance.
11. Patients must not open or close any windows or registers of a ward at their own option.
12. Patients must be in bed so that lights may be extinguished at 9 p. m., unless by special permission.
13. Visitors are admitted between the hours of 2 p. m. and 8 p. m., subject to the restrictions of the physician in charge.
14. The hospital will not be responsible for any property be-

longing to patients unless deposited in the safe in the office, where money and valuables may be deposited, for which articles when so deposited a receipt will be given.

15 Patients wishing to see the chaplain when at the hospital, or at any other time, or desiring a visit from a minister of any other denomination, shall signify the same to the Resident Physician or Superintendent of Nurses.

FORM OF BEQUEST.

To those who may feel disposed to donate by Will to St. Luke's Hospital, the following is submitted as a form:—

Form of Bequest of Personal Property.

I give and bequeath unto "St. Luke's Hospital," a corporation existing under the laws of the State of California, the sum of..... Dollars, to be applied to the use of said corporation.

Form of Devise of Real Estate.

I give and devise unto "St. Luke's Hospital," a corporation existing under the laws of the State of California, for its corporate purposes, all (here insert description of property).

Together with all the appurtenances, tenements and hereditaments thereunto belonging or in anywise appertaining. To have and to hold the same unto the said corporation, its successors and assigns forever.

Section 1313 of the Civil Code of this State provides that "No estate, real or personal, shall be bequeathed or devised to any charitable or benevolent society or corporation, or to any person or persons in trust for charitable uses, except the same be done by will duly executed at least thirty days before the decease of the testator; and if so made at least thirty days prior to such death, such devise and legacy, and each of them, shall be valid; **provided**, that no such devises or bequests shall collectively exceed one-third of the estate of the testator leaving legal heirs, and in such case a pro rata deduction from such devises or bequests shall be made, so as to reduce the aggregate thereof to one-third of such estate; and all dispositions of property made contrary hereto shall be void, and go to the residuary legatee or devisee, next of kin, or heirs according to law.
